Aw Nutz, a true reverie from the usual awful indie game market, offers endless hours of fun for a mere 5 dollars. I can see this game gaining a lot of friction among players once some more time rolls forth! HIGHLY RECOMMENDED!!!. Multiplayer only game costs \$5.99NZD.

Of COURSE no one is playing.

This needs to be F2P with some cosmetics or something.

<https://youtu.be/V9yqBAo-omzQ>. I thought it would've been a pretty fun game to play with friends... I was wrong.

We played for about 20 minutes, and probably will never play it again.

This had to become a free game, nobody should pay any amount for such a broken game.

I actually won - one of the 3 games that we done - by clipping through the back of the human's head.. The concept is interesting but the controls are very bad.

The camera is not fluid.

My friend passed threw my head and won the came. (Bad collision).

Moving up the stairs for a nut take way to much time.
